

| ITEM | DESCRIPTION         | QTY | MATERIAL  | REMARK |
|------|---------------------|-----|-----------|--------|
| 1.   | Cylindrical Shell   | 1   | SS304     |        |
| 2.   | End Caps            | 2   | SS304     |        |
| 3.   | Top Nozzle          | 1   | SS304     |        |
| 4.   | Bottom Drain Nozzle | 1   | SS304     |        |
| 5.   | Flanges             | 5   | ASTM A182 |        |

#### GENERAL INSTRUCTIONS

- ALL DIMENSION ARE IN MM UNLESS SPECIFIED OTHERWISE.
- ALL BUTT WELD SHALL BE 100% DP TESTED.
- FLANGE FACING FINISH SHALL BE 125-250 AARH.
- INSIDE SURFACE & WELDED SURFACE OF THE VENTURI WILL BE SMOOTHLY CLEAN BY VENDOR.
- DEGREE 37°30' SHALL BE PROVIDED FOR FULL PENETRATION WELD JOINTS.
- SURFACE FINISH: INSIDE AND OUTSIDE – ACID CLEANED.
- TRANSPORT: BLANK THE FLANGE OPENING WITH WOODEN SHEET / METAL SHEET.
- TOLERANCE AS PER STANDARD UNLESS OTHERWISE SPECIFIED.
- DO NOT SCALE THE DRAWING.
- REMOVE ALL SHARP CORNERS.
- MATERIAL DESCRIPTION SIZE PER ASTM/ASME AS APPLICABLE.

#### REFERENCE STANDARDS

- ASME Section VIII Div. 1 - Rules for fabrication of pressure vessels
- ASME B31.3 - Process Piping Code
- ASME Section IX - Welding Procedure & Welder Qualification
- ASME Section II Part A - Material Specifications
- ASTM A240 - Stainless Steel Plate, Sheet & Strip
- ASTM A312 - Stainless Steel Seamless/Welded Pipe
- ASTM A182 - Forged Stainless Steel Flanges
- ASME B16.5 - Pipe Flanges and Flanged Fittings
- ASME B16.25 - Butt-Welding Ends

|                                                                                                                                                                                                                                                                                                                                                                                                                                    |      |             |    |      |             |    |                                                                                                                                              |                                    |              |              |               |
